ElasTest

**An elastic platform for
testing complex distributed
large software systems**

European projects

ElasTest in a nutshell

- Large distributed software systems are common nowadays, but it is very difficult to assess that distributed software complies with the quality demanded by users
- The objective of ElasTest is to provide a flexible open source testing platform aimed to simplify the end-to-end testing processes for different types of applications

ElasTest in a nutshell

ElasTest proposal

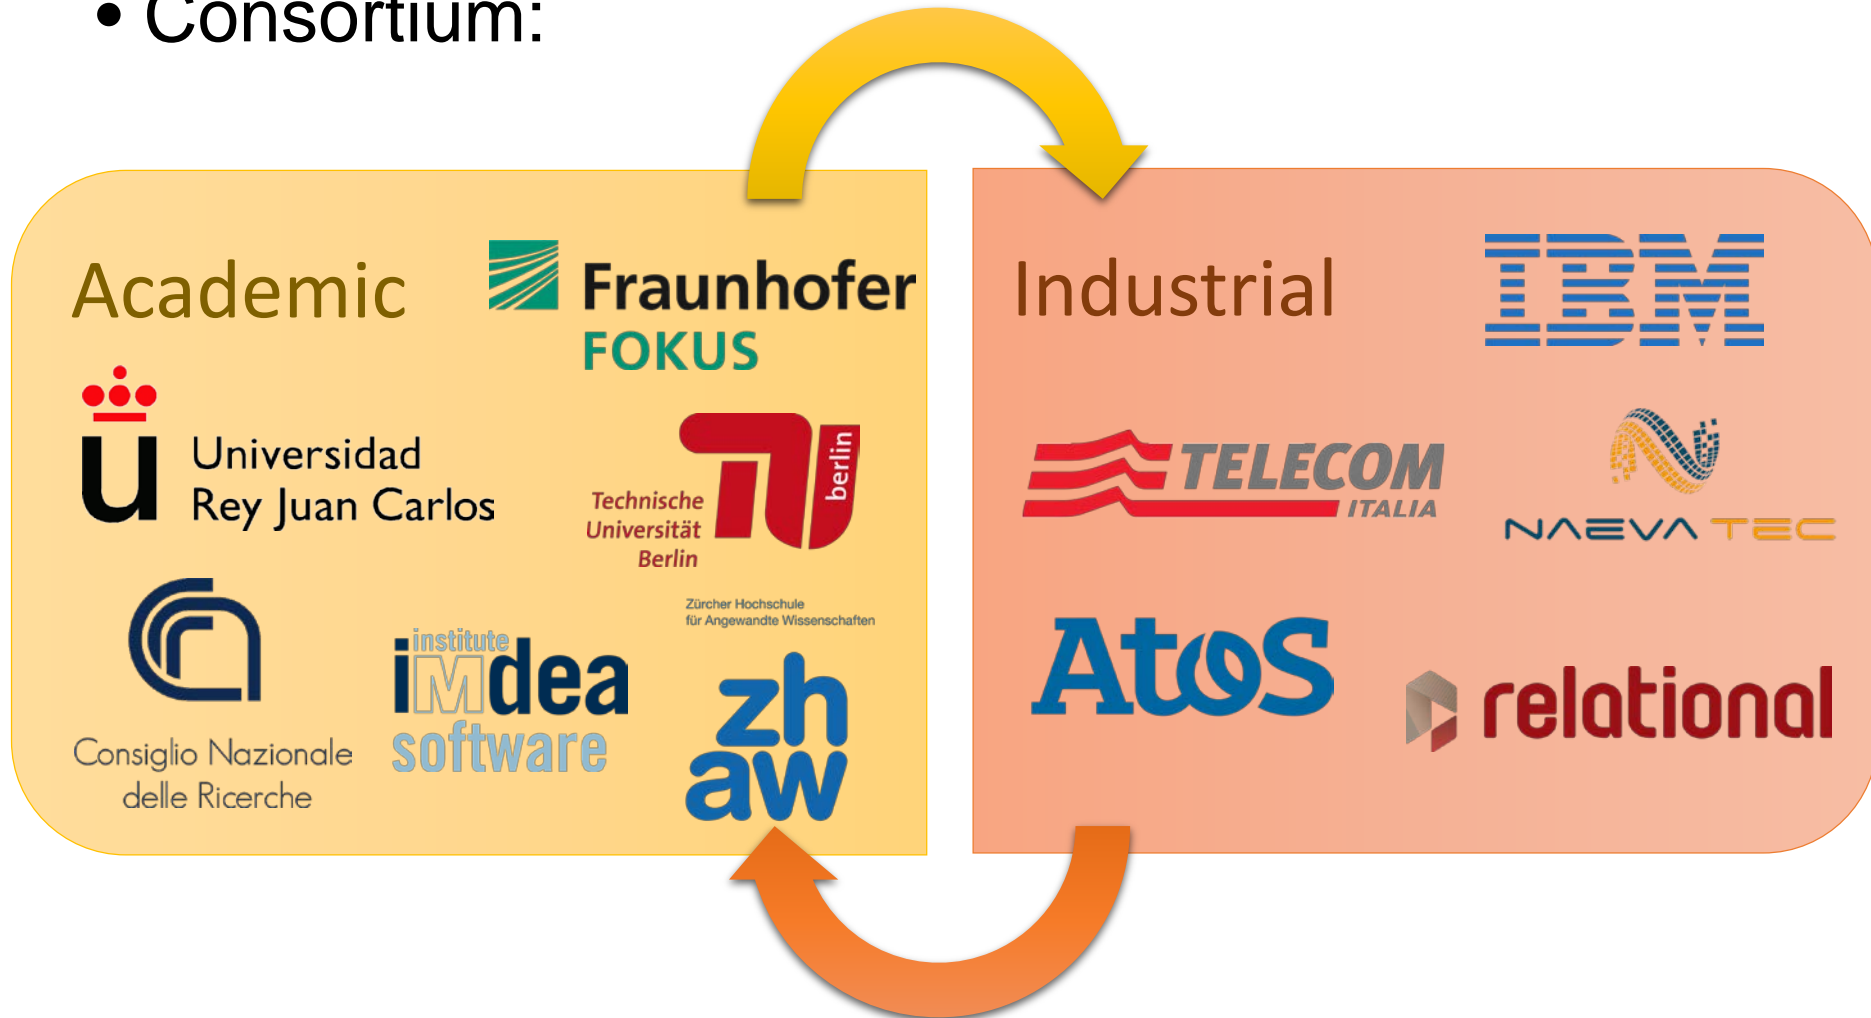

- Lean Startup methodology
 - Aligned with industry
 - Continuous market scouting
- 4 demonstrators
 - Web/Mobile
 - 5G
 - IoT
 - WebRTC (real-time video on the Web)
- Ambitious hypothesis
 - Good validation approach is critical
- Support letters
 - Facebook, Google, Ericsson, Saab, ...

ElasTest proposal
